## Opportunities with Us

We are always looking for new talent with great ideas. If you might like to work with us and our clients then please introduce yourself. You can send us an [email](#) or click [here](#)

## Why Join Us

**We have a learning culture:** We are continuously learning and seeking colleagues who have that same drive to learn, to challenge, to grow and to deliver.

**You will be supported:** We are a young company with strong industry leading expertise in the core areas of our business. Learning whilst doing is a key feature of our philosophy and we also recognise that for some of our colleagues this will need to be supplemented with academic study.

**Our work is varied:** Working with us is extremely varied due to the range of sectors, clients and projects on which we engage.

**The projects are interesting:** make no mistake, you will be challenged. Clients come to us to help them solve problems. Our work is interesting and challenging.

**We are flexible:** Colleagues working with us appreciate our flexible business model. Colleagues currently operate in a range of ways with us: working remotely, from home; part-time or full-time; for a specific project or for a contracted term. Contracts with us could be as an employee, or as an approved sub-contractor, or as an accredited associate.

**We share the rewards:** Our success is your success. We offer employees and associates the opportunity to share incentives and also to participate in our share option scheme. As the business grows it will also create new opportunities for our colleagues.

# 3D Consultancy™

## About Us

We are an engineering design and manufacturing consultancy providing technical solutions utilising advanced 3D printing/additive manufacturing, 3D scanning and CAD digital processes using the latest materials and processes, with industry leading expertise in composite materials technologies.

Coming from the fast-paced world of F1 racing, we know how important it is to deliver cutting edge products quickly and efficiently without compromising quality. We focus in sectors where we have demonstrable experience, principally: motorsport and engineering, transport and industrial, medical and scientific, and modelmaking and creative industries.

We are a UK company whose heritage and pedigree is embedded in the highly demanding and competitive world of F1 Racing. We are proud to have worked with World Championship teams and with industry leading clients in many other markets. Our experience extends across small start-ups with great growth ambitions to large international corporations.
